1. **What is Cost Sharing?**
   Cost sharing or matching represents the portion of sponsored award costs borne by the Institute, and not the funding agency. Cost sharing is auditable, allowable under applicable federal cost principles (*e.g.*, meets the same criteria as a direct cost to the project), and verifiable in Institute accounting records.

2. **How do I know if my grant requires cost sharing?**
   Check the sponsor program announcement for any cost sharing requirements. In accordance with Office of Management and Budget (OMB) Uniform Administrative Requirements, Cost Principles, and Audit Requirements (2 CFR 200), Federal agencies must include the policies relating to cost share in the notice of funding opportunity. In addition, fixed price award types cannot be used in programs which require mandatory cost sharing or matching.

   Once awarded, the OSP Contract Information System will list the amount of required cost share, if applicable, on the Project Header tab.

3. **Why is Cost Sharing at Georgia Tech discouraged when not required by the sponsor?**
   Unless stated otherwise in the solicitation, voluntary committed cost sharing (match, in-kind, institutional commitment, etc.) under Federal research proposals is not expected and cannot be used as a factor during the merit review of applications or proposals. It may be considered if it is both in accordance with Federal awarding agency regulations and specified in a notice of funding opportunity.

   A proposal that voluntarily offers cost sharing represents a binding commitment if the proposal is awarded, which must be documented and is subject to audit.

4. **What is the difference between “mandatory (formal)” and “voluntary (informal)” cost sharing?**
   Mandatory cost sharing is required by the sponsor as a condition of the award, which must be indicated in the program announcement.

   Voluntary cost sharing is not required by the sponsor but is offered in the proposal by the investigator; commonly in the form of contributed effort. Cost sharing that is included in the proposal voluntarily by the investigator becomes mandatory (also known as 'voluntary committed' cost sharing) once the award is made.

   All mandatory/committed cost sharing must be accounted for and tracked in the Institute’s official accounting records.

5. **What is “in-kind” cost sharing?**
   In-kind contributions represent the value of non-cash contributions provided by the Institute or other third parties. Examples are tuition remission, waived overhead, and sponsored research contributions from industry/third party sponsors.

6. **How can I request cost share?**
   - Identify whether or not department resources are available
   - Complete the required form found at [http://www.osp.gatech.edu/forms-library/](http://www.osp.gatech.edu/forms-library/)
   - After obtaining approval at the department, school, and college level, forward to the Executive
Cost Sharing - Frequently Asked Questions

Vice President for Research (EVPR) office for consideration, if applicable

Departments should seek funding for cost sharing commitments from the School/Center and Dean’s Office prior to the EVPR’s Office.

7. **What are the guiding principles of the EVPR office during review and consideration of cost share requests?**

The EVPR office will evaluate cost share requests based on the following criteria:

- School and/or College’s willingness to commit resources
- Strategic interest of the proposed research to the Institute
- Reasonableness of the request given total budget and F&A cost recovery
- Availability of funds
- Whether the request is greater than 6-10% of F&A cost recovery (Requests in excess of this threshold are generally not supported unless a compelling description of the benefit “beyond sponsored award” is provided)
- For established PIs, a track record of generating a high volume of sponsored awards
- For new PIs, the strategic area of emphasis
- Availability of Foundation, endowment, or other appropriate funds that the Principal Investigator (PI) can use to meet cost share

8. **What is the difference between cost sharing and internal or institutional support?**

Cost sharing or matching represents the portion of sponsored award costs borne by the Institute, and not the funding agency. Cost sharing is required by the sponsor, auditable, must be allowable under applicable federal cost principles (*e.g.*, meets the same criteria as a direct cost to the project), and verifiable in Institute accounting records.

Internal or institutional support/funding may be provided, upon request and approval, to support research initiatives although this type of support is not required by the sponsor nor is it tracked as part of the sponsored research award as cost sharing.

9. **Why does cost sharing require institutional approval before the proposal is submitted?**

Prior to submission of a proposal, the signature of an institutional official is required on the cost sharing form to ensure non-federal funds have been secured to meet cost sharing commitments. If the funding source for cost sharing is documented as “To Be Determined” during the proposal phase, the unit originating the proposal will be financially obligated until an allowable source is committed.

Departments should seek funding for cost sharing commitments from the School/Center and Dean’s Office prior to the EVPR’s Office.

10. **Can unrecovered Facilities & Administrative (F&A) costs be used as cost sharing?**

Unrecovered indirect costs should be included as part of cost sharing or matching on the proposal, and is allowable as cost sharing approved by the sponsor. A reduced F&A waiver request must be completed and approved prior to proposal submission.

Updated: 11/16/2021
11. Are there monetary limits to the amount of cost sharing that will be available?
The commitment of funds for cost sharing is subject to the availability of funds for that purpose. Generally speaking, reduced F&A may be approved when the proposal solicitation or other published information identifies that the sponsor rate (U.S. Sponsors only) is less than the Institute’s current negotiated rates and the sponsor treats the F&A requirement consistently for all awardees. Foreign sponsors with reduced F&A requirements are not typically approved.

12. What steps are necessary to document tuition remission as cost share?
Tuition remission should be listed on the cost share summary sheet and approved by the Sponsor in the proposal budget. If tuition remission is deemed unallowable cost share in the pre-award process the Grants Analyst will flag the grant with a spend restriction to prevent it from posting.

13. How does Cost Share tuition remission post in Workday?
Cost Share tuition remission is a manual journal entry that is entered into Workday by the Grant and Contracts staff. It is not currently automated like the standard tuition remission processes. The journal normally posts mid-month for the prior closed Commitment Accounting period. The charges will appear in the 8500 Other Direct Costs object code.

14. Why does the Institute need to track cost sharing?
Cost Accounting Standards require that costs proposed on a sponsored award application be accumulated and reported completely and accurately. In addition, Federal regulations require full accountability for costs committed in the fulfillment of sponsored projects.

15. What steps must the department take to track mandatory cost sharing?
The required cost sharing amount is documented under the project header, budget, billing, and funds tabs in the OSP Contract Information System. The Contractual docs tab includes a scanned copy of the completed cost sharing form, if applicable. If subagreements include cost sharing, this information is available by selecting the subagreements tab in the OSP Contract Information System and selecting the name of the institution to review additional details and cost sharing requirements.

In the event cost sharing is identified as a requirement during the pre-award phase / initiation of the award, a companion cost share project will automatically be set up as a Cost Share Grant in Workday, which can be viewed and monitored using the Sponsored Award Budget Expense Report (SABER).

If cost share requirements are identified and communicated after the award is initiated or if the cost share will be partially met by another department within the Institute, departments can send a request in Workday for a new award line/grant to be established to their Grant Analyst.

Allowable and allocable expenses that meet the same criteria as a direct cost to the project should be allocated directly to the companion cost share project throughout the life of the award. In accordance
Cost Sharing - Frequently Asked Questions

Resident Instruction

with applicable institutional policies, cost transfer requests related to cost share and cost share certifications must be managed in a timely manner.

16. How should third-party commitments be documented?
Proposal stage – Third party commitment letters signed by an authorized representative of the organization on letterhead should be secured and submitted to OSP by the PI, along with the signed cost sharing form. Documentation must be provided in the form of a letter. At a minimum, the following information should be included in the letter: title of the authorized representative, type of contribution (e.g. personnel effort, supplies, etc.), monetary value, and reference to the award, PI and/or proposal to which the cost share is related.

Award management & close-out stage – Using the same criteria noted above, the PI should obtain a written certification letter that summarizes and confirms the cost sharing proposed has been met by the third party. This information should be submitted to the assigned Grants & Contracts Analyst (available in SABER) who will document the cost share commitment in the assigned cost share grant or a cost share grant set up specifically for in-kind.

17. Are there additional requirements if cost sharing is passed down in a subagreement?
Yes. When submitting a subcontract request to OSP, please work with the Contracting Officer to ensure all cost share requirements of the Institute are passed through to the subcontracting Institution in the terms and conditions of the subagreement.

Subcontract invoices are routed through OSP to the PI and department to verify the expectations have been met, including any required cost share commitments. In the event cost share is required and is not reported on the subcontractor invoice, it is recommended that departments withhold approval for payment. The department should follow-up with the collaborator to obtain the information or contact OSP, who can assist in this regard.

Georgia Tech’s cost share report to the sponsor must include all obligations, including those that the Institute passed down to the subcontract Institution or other third party.

18. What expenditures are allowable as cost sharing?
Cost share commitments are auditable and must meet the same criteria as a direct charge to an award. Any expenses that cannot meet the criteria below are not eligible to be recorded or reported as cost share.

• Necessary and reasonable for proper and efficient accomplishment of project objectives
• Allowable, allocable, reasonable, and consistently treated under applicable federal costs principles
• Are verifiable from the official Institute accounting records
• Are incurred during the project period of the grant or during the pre-award phase, when authorized by the sponsor
• Documented in the approved sponsor budget
• Are not paid by the Federal Government under another award, except where authorized by federal statute to be used for cost sharing or matching
• May only be cost shared on one project

Updated: 11/16/2021
19. **Can other federal grant funds be used as a source of cost sharing on a sponsored project?**
   No, federal dollars cannot be used as cost share including federal funds that “pass-through” another sponsor to Georgia Tech. An exception may be made where authorized by federal statute to be used for cost sharing or matching, which requires institutional review and approval.

20. **What happens if I cannot meet my cost sharing commitment as originally expected/proposed?**
    Cost share expenses should generally be incurred at the same rate as the sponsor’s portion of award expenses. If cost sharing requirements have not been met, and the sponsor is unwilling to renegotiate the amount, it is likely that the funds provided by the sponsor will be reduced by the amount the shortfall represents. Not meeting the cost-sharing requirement puts the award at risk of being deemed non-compliant by the sponsor and may require the Institute to have to return the funding.

21. **What happens if I want to request a modification to the cost sharing commitment from my sponsor?**
    Cost share expenses should generally be incurred at the same rate as the sponsor’s portion of award expenses. If the project includes a requirement for cost sharing, it is important for the department to monitor the grant closely to ensure that the institute meets those requirements. If there is a concern that the institute will be unable to meet the committed amount or proposed funding is reduced for a year, it is essential that the sponsor is contacted as soon as possible to request approval for a budget modification or an amendment to the award. The assigned OSP contact should be involved in this communication.

22. **What steps are taken if PI effort will be managed as cost sharing to comply with the Institute’s “Minimum Effort” policy?**
    Sponsors expect a commitment of some effort on the part of the PI to conduct work, supervise personnel, prepare deliverables, etc. during each project year. In order to comply with the Minimum Effort policy, a formal companion cost share grant must be established if the PI chooses to cost share this effort instead of charging it to the sponsored award. Cost sharing of this nature will not be reflected on the invoices or financial reports submitted to the sponsor.

    Companion cost share grants are established in the official Institute records and are reflected on the employee’s Workload Assignment Form (WAF), which is e-mailed to employees each month from the Cost Accounting and Compliance team in the Office Grants and Contracts Accounting.

    If minimum effort will be cost shared and no other cost share is required, contact the OSP Contracting Officer (CO) to have the amount entered into the OSP Contract Information System as a cost share requirement. A cost share grant number should then be requested by the CO via email to their Grant Analyst.
23. What are the roles and responsibilities of the department and research administration?

**PI and Department:**
- Determine the cost sharing requirements of the project
- Evaluate the workload implications of proposed cost sharing
- Ensure that total effort for an individual does not exceed 100%
- Identify the cost share funding source
- Upon award, enter budgets via the Institute budgeting process
- Request companion cost share grant lines, if applicable
- Identify, quantify, and document required cost sharing
- Provide third party documentation to Grants & Contracts Accounting on a timely basis to ensure commitments are recorded in the Institute’s official accounting system
- Collaborate with OSP and Grants & Contracts Accounting to submit cost sharing reports that comply with sponsor reporting requirements, if applicable
- Ensure that cost sharing commitments are met and properly budgeted and recorded (including third party commitments)
- Ensure subcontractors properly reflect cost share accomplishments on invoices

**Office of Sponsored Programs:**
- Assist with preparation of pre-award documents (contact assigned Contracting Officer)
- Assist in the collection of third party commitment letters, if needed
- Incorporate appropriate cost sharing conditions in subcontract agreements, if applicable
- Provide initial review of subcontractor invoices prior to routing to departments for approval and verification that each subcontractor has billed cost share accomplishments in accordance with contract requirements

**Grants & Contracts Accounting:**
- Review cost share expenditures to ensure compliance with terms and conditions of the sponsored award
- Review in-kind certifications and back-up documentation before posting cost share to the system
- Prepare and submit cost share reports, per sponsor reporting requirements
- Verify cost sharing requirements have been met at close out

24. Where can I access additional information about cost share?

For additional information on this topic, please reference 2 CFR 200 and institutional policies and procedures located on the Grants & Contracts Accounting and Office of Sponsor Programs websites. Links are provided below.
