<p style="text-align: center;">COST ACCOUNTING STANDARDS BOARD DISCLOSURE STATEMENT REQUIRED BY PUBLIC LAW 100-679 EDUCATIONAL INSTITUTIONS</p>	<p style="text-align: center;">Georgia Institute of Technology (Other than GTRI)</p> <p style="text-align: center;">GENERAL INSTRUCTIONS</p>
<p>1. This Disclosure Statement has been designed to meet the requirements of Public Law 100-679, and persons completing it are to describe the Educational institution and its cost accounting practices. For complete regulations, instructions and timing requirements concerning submission of the Disclosure Statement, refer to Section 9903.202 of Chapter 99 of Title 48 CFR (48 CFR 9903).</p> <p>2. Part I of the Statement provides general information concerning each reporting unit (e.g., segments, business units, and central system or group (intermediate administration) offices). Parts II through VI pertain to the types of costs generally incurred by the segment or business unit directly performing under Federally sponsored agreements (e.g., contracts, grants and cooperative agreements). Part VII pertains to the types of costs that are generally incurred by a Central or Group office and are allocated to one or more segments performing under Federally sponsored agreements.</p> <p>3. Each segment or business unit required to disclose its cost accounting practices should complete the Cover Sheet, the Certification, and Parts I through VI.</p> <p>4. Each central or group office required to disclose its cost accounting practices for measuring, assigning and allocating its costs to segments performing under Federally sponsored agreements should complete the Cover Sheet, the Certification, Part I and Part VII of the Disclosure Statement. Where a central or group office incurs the types of cost covered by Parts IV, V and VI, and the cost amounts allocated to segments performing under Federally sponsored agreements are material, such office(s) should complete Parts IV, V, or VI for such material elements of cost. While a central or group office may have more than one reporting unit submitting Disclosure Statements, only one Statement needs to be submitted to cover the central or group office operations.</p> <p>5. The Statement must be signed by an authorized signatory of the reporting unit.</p> <p>6. The Disclosure Statement should be answered by marking the appropriate line or inserting the applicable letter code which describes the segment's (reporting unit's) cost accounting practices.</p> <p>7. A number of questions in this Statement may need narrative answers requiring more space than is provided. In such instances, the reporting unit should use the attached continuation sheet provided. The continuation sheet may be reproduced locally as needed. The number of the question involved should be indicated and the same coding required to answer the questions in the Statement should be used in presenting the answer on the continuation sheet. Continuation sheets should be inserted at the end of the pertinent Part of the Statement. On each continuation sheet, the reporting unit should enter the next sequential page number for that Part and, on the last continuation sheet used, the words "End of Part" should be inserted after the last entry.</p> <p>8. Where the cost accounting practice being disclosed is clearly set forth in the institution's existing written accounting policies and procedures, such documents may be cited on a continuation sheet and incorporated by reference. In such cases, the reporting unit should provide the date of issuance and effective date for each accounting policy and/or procedures document cited. Alternatively, copies of the relevant parts of such documents may be attached as appendices to the pertinent Disclosure Statement part. Such continuation sheets and appendices should be labeled and cross-referenced with the applicable Disclosure Statement item number.</p> <p>9. Disclosure Statements must be amended when disclosed practices are changed to comply with a new CAS or when practices are changed with or without agreement of the Government (Also see 48 CFR 9903.202-3).</p> <p>10. Amendments shall be submitted to the same offices to which submission would have to be made were an original Disclosure Statement being filed.</p>

COST ACCOUNTING STANDARDS BOARD DISCLOSURE STATEMENT REQUIRED BY PUBLIC LAW 100-679 EDUCATIONAL INSTITUTIONS		Continuation Sheet # 2 PART I - GENERAL INFORMATION <hr/> NAME OF REPORTING UNIT Georgia Institute of Technology (Other than GTRI)	
Item No.	Item Description	Revision Number 13 – Effective: July 1, 2021	
1.3.0	<p>Unallowable Costs-Combination of A and B.</p> <p>“R-12” Unallowable Costs, as defined by 2 CFR 200, are identified by specific identification in the “R-12” formal accounting records of the Institute and through the use of separately prepared and maintained accounting records and work papers. The procedures used are as follows:</p> <p>“R-13” 1. Specific Identification in the formal accounting Records.</p> <p>“R-13” Within the Financial Data Model (FDM) used by the Institute, two features are used to “R-13” identify Unallowable Costs. The first feature assigns individual worktags to departments, cost “R-13” centers and offices (such as Development Offices) that are unallowable for charges against “R-5” “R-5” Federally sponsored projects. The second feature permits the identification of unallowable expenses “R-5” (such as certain travel, advertising, entertainment) within departments, cost centers and offices where “R-5” the other activities are allowable. “R-12”</p> <p>“R-13” Information concerning the use of these worktags and ledger accounts has been provided to “R-13” “R-5” budget managers in written form and through training classes. In addition the Listing of Account “R-5” codes contains instructions concerning the use of these codes and the information required to identify expenditures that are unallowable for Federal costing purposes.</p> <p>2. Separately Prepared and Maintained Accounting Records and Work papers</p> <p>“R-12” Subpart E of 2 CFR 200 specifically identifies activities that are unallowable for Facilities & “R-12” “R-5” Administrative cost rate determination purposes. Many of these activities are necessary for “R-5” “R-5” the operation of an educational institution and must be supported by the institutional operating “R-5” “R-5” budget and recognized in the accounting records. Examples of these activities include the “R-5” “R-5” operation of an Alumni Office and Development Office. Unallowable expenses of this nature “R-5” “R-5” are specifically identified in the accounting records and they are reported with other “R-5” “R-5” unallowable expenses as Other Institutional Activities. Expenses of this nature are identified “R-5” “R-5” as part of the Facilities & Administrative rate study and appropriate accounting records and “R-5” “R-5” supporting documents are maintained for audit and review purposes. “R-5”</p>		
1.3.1	<p>Treatment of Unallowable Costs</p> <p>“R-12” Unallowable costs are identified as described above and, as required, reclassified from the functional activity classification used in the financial statements to "Other Institutional Activities", a direct cost objective identified in 2 CFR 200. Expenditures accounted for as "Other Institutional “R-12” “R-5” Activities” receive an appropriate allocation of indirect costs through the procedures outlined “R-12” in 2 CFR 200 which allocate expenses on the basis of Modified Total Direct Costs (MTDC). “R-12” Space used by offices and departments specifically identified as unallowable is also classified as used by "Other Institutional Activities" which causes Building Depreciation, Equipment “R-5” Depreciation, Interest and Operation and Maintenance of Plant Expenses to be allocated to this “R-5” activity. The use of these procedures assures that an appropriate share of indirect costs is allocated to unallowable costs and that other activities are not charged for support costs that benefit unallowable expenses and activities.</p>

Item No.	Item Description	Revision Number 13 – Effective: July 1, 2021
1.5.0	<p>State Laws or Regulations The following State laws and regulations influence the Institute's cost accounting practices.</p> <p>a. State University System Accounting Instructions</p> <p>Financial records and reports of Georgia Institute of Technology are maintained according to the requirements of the Board of Regents of the University System of Georgia as developed to conform to the generally accepted accounting principles for Colleges and Universities and State of Georgia accounting and reporting requirements. To comply with this regulation, the Institute must maintain books and records that do not match the requirements of 2 CFR 200. In addition, changes in “R-12” accounting requirements of the Board of Regents may create the need to revise cost accounting procedures to obtain information needed for the annual Facilities & Administrative cost rate “R-5” determination. Such changes are addressed in annual planning. “R-5”</p> <p>b. State Cost Allocation Plan.</p> <p>Costs incurred by State and Board of Regents offices are identified in a Cost Allocation Plan that is submitted to, audited, and approved by the cognizant Federal audit agency of the Board of Regents. Costs allocated to the Georgia Institute of Technology by this Plan are recognized in the annual Facilities & Administrative cost rate proposal in the General Administrative and General “R-5” Expense, Student Administration and Services, and Operation and Maintenance indirect cost “R-5” pools. Because these costs are based on Federal audits and negotiations, a separate “R-5” Disclosure Statement for the Board of Regents has not been prepared. “R-5”</p> <p>c. State Purchasing Regulations</p> <p>As a member institution of the University System of Georgia, the Institute follows State of Georgia purchasing regulations. These regulations have been incorporated into the operating procedures of the Institute. However, changes to the regulations made by the State or the Board of Regents could influence the activities of the Purchasing Department and the acquisition of goods and services. Georgia Institute of Technology policy allows a micro-purchase threshold (MPT) on Federal “R-12” financial assistance awards at \$25,000. Procurements greater than this amount require review “R-13” by Purchasing. “R-12”</p> <p>d. Travel Regulations</p> <p>As a member institution of the University System of Georgia, the Institute follows State of Georgia travel regulations. These regulations have been incorporated into the operating procedures of the Institute for all travel expenses including the cost of airfare, mileage, lodging, and other subsistence expenses. However, changes to the regulations made by the State or the Board of Regents could influence the travel of employees as it relates to State contracts for airline travel and/or the use of other travel services.</p>

1.5.0	<p>State Laws or Regulations (Continued) The following State laws and regulations influence the Institute's cost accounting practices.</p> <p>e. Vacation accruals</p> <p>“R-11” In accordance with State and Board of Regents policies, a provision for liability and related “R-11” “R-11” expenses of earned but not taken leave is made on the financial statements of the Institute for “R-11” “R-11” reporting purposes. There is no provision made for this liability on each sponsored “R-11” “R-11” agreement except for the estimated terminating vacation leave component included in the “R-11” “R-11” fringe benefit rate. “R-11”</p> <p>f. Pensions Plans</p> <p>Georgia Institute of Technology participates in the Teachers Retirement System of Georgia (TRS), which is a cost sharing, multiple employer, public employee retirement system (PERS). This plan is part of a State government pension plan. The Plan also offers an Optional Retirement Plan (ORP) to exempt employees. The Optional Retirement plans are defined contribution retirement plans.R-12 (See description in Part VI item nos. 6.1.2. and 6.2.0.).</p> <p>g. Building Construction</p> <p>“R-4” As of July 1, 2001, the State of Georgia and the Board of Regents of the University System of “R-4” “R-4” Georgia was required to implement Governmental Accounting Standards Board (GASB) “R-4” “R-4” Statement No. 34 and No. 35, <i>Basic Financial Statements and Management’s Discussion and “R-4”</i> “R-4” <i>Analysis for State and Local Governments and Public Colleges and Universities</i>. These actions, “R-4” “R-4” which apply to Georgia Institute of Technology, required the implementation of new accounting “R-4” “R-4” procedures for capital assets including the establishment of new capitalization thresholds and the “R-4” “R-4” implementation of the use of depreciation methodologies. Descriptions of the changes made are “R-4” “R-4” provided in the appropriate section of Part III Indirect Costs. “R-4”</p> <p>h. Property and Casualty Insurance</p> <p>Georgia Institute of Technology participates in a self-insured trust fund for casualty insurance maintained by the State of Georgia. The Institute is billed for services provided through the State of Georgia Department of Administrative Services. Casualty insurance premiums are based on replacement cost and the Institute is billed for the coverage on an annual basis.</p> <p style="text-align: center;">-End of Part-</p>

Item No.	Item Description	Revision Number – Effective Date:
	Instructions for Part II Institutions should disclose what costs are, or will be, charged directly to Federally sponsored agreements or similar cost objectives as Direct Costs. It is expected that the disclosed cost accounting practices (as defined at 48 CFR 9903.302-1) for classifying costs either as direct costs or indirect costs will be consistently applied to all costs incurred by the reporting unit.	
2.1.0	<u>Criteria for Determining How Costs are Charged to Federally Sponsored Agreements or Similar Cost Objectives.</u> (For all major categories of cost under each major function or activity such as instruction, organized research, other sponsored activities and other institutional activities, describe on a continuation sheet, your criteria for determining when costs incurred for the same purpose, in like circumstances, are treated either as direct costs only or as indirect costs only with respect to final cost objectives. Particular emphasis should be placed on items of cost that may be treated as either direct or indirect costs (e.g., Supplies, Materials, Salaries and Wages, Fringe Benefits, etc.) depending upon the purpose of the activity involved. Separate explanations on the criteria governing each direct cost category identified in this Part II are required. Also, list and explain if there are any deviations from the specified criteria.)	
2.2.0	<u>Description of Direct Materials.</u> All materials and supplies directly identified with Federally sponsored agreements or similar cost objectives. (Describe on a continuation sheet the principal classes of materials which are charged as direct materials and supplies.)

Item No.	Item Description	Revision Number 13 – Effective Date: July 1, 2021
2.1.0	<p>Criteria for Determining How Costs are Charged to Federally Sponsored Agreements or Similar Cost Objectives.</p> <p>The primary direct cost functions of Georgia Institute of Technology are Instruction, Research, Public Service, Service/Recharge Centers, and Other Institutional Activities. Costs incurred to support these activities, such as salaries and wages, fringe benefits, materials and supplies, travel, subcontracts, specialized services center charges, equipment, and other operating expenses are treated as direct costs when identified through specific identification of the individual costs to the benefiting projects and/or other appropriate procedures as required under the circumstances.</p> <p>The procedures used for identification of direct costs by function to benefiting projects and activities apply to sponsored, cost sharing, and institutionally supported projects and activities. Committed cost sharing expenses are separately budgeted and accounted for in the accounting records and included in the appropriate direct cost bases by function.</p> <p>Institute accounting procedures are designed to assure that all costs incurred would be considered reasonable, necessary, allowable, and in accordance with the terms and conditions of the sponsored agreements. Costs are recognized as direct charges to a sponsored project using one or more of the following procedures:</p> <ol style="list-style-type: none"> 1. Specific identification: Costs incurred solely to advance the work under the sponsored agreement. 2. Service/Recharge Center: Costs identified to a particular sponsored project based on actual utilization of services and cost based-charge rates. 3. Proportional Allocation: Costs that benefit two or more worktags or activities in proportions that can be determined without undue effort or cost. 4. Mechanical/Accounting System Charges: Costs of minor supplies and services that are identified to the cost objectives by billing systems that are supported by approved requisitions or orders that identify the benefiting sponsored projects or other activities. 	
“R-13”		
“R-13”	Costs incurred for administrative and support services that benefit joint departmental general activities are identified separately in the accounting records and recognized as indirect

Item No.	Item Description	Revision Number 13 – Effective Date: July 1, 2021
2.1.0	<p>Criteria for Determining How Costs are Charged to Federally Sponsored Agreements or Similar Cost Objectives. (Continued)</p> <p>In instances where sponsored projects require the services of administrative and clerical staff, supplies, postage, special space renovations, and telecommunications costs (expenses similar to, but not the same as, the charges identified in the indirect administrative worktags), such costs will be charged to sponsored agreements as direct costs when:</p> <p>1. The specific type and nature of the services are not provided by the indirect expense projects. 2. The services are required by the project scope, 3. The cost can be accurately identified to the project, and 4. The approved project budget clearly describes the need for the services.</p> <p>Administrative and clerical support costs will be charged as direct costs for a sponsored project when:</p> <p>1. Costs are integral to the project or activity; 2. Individuals involved can be specifically identified with the project or activity; 3. Such costs are explicitly included in the budget or have prior written approval of the Federal awarding agency; and 4. The costs are not also recovered as indirect costs.</p> <p>Other special circumstances for direct charging of costs occur when sponsored projects require specific support services that are not provided by the indirect administrative worktags. Examples of instances where sponsored projects will be charged directly for support services are described below:</p> <p><u>-Secure facilities required by a specific program-</u> If a program requires the creation of new secure facilities, including the acquisition of alarm equipment, special construction, or other project-specific facilities costs, these are charged to the program. (These special-purpose facilities may or may not be usable by future programs.)</p> <p><u>-Special Research Security services -</u> Campus Safety expenses (general campus and perimeter security that benefits all activities) and building or site specific security that benefits multiple awards are provided by the Institute as indirect expenses. Some programs, however, due to the level of classification/special access, require project specific additional security services. These services, where managed and/or contracted for separately from the existing security services, are charged directly to sponsored awards.</p> <p><u>-Telecom charges</u> - Telecommunications required for general and institutional business are indirect costs. Exceptions are made for equipment and toll charges for phones needed in field work, cellular phones needed for field site coordination, and phone call charges while on travel.</p> <p><u>-Motor vehicle expenses</u> - Maintenance expenses of award-dedicated vehicles and vehicles used in the field will be directly charged to worktags, as well as motor vehicle expenses incurred on travel.</p>

Effective July 1, 2001, the total cost of each complex building was adjusted to recognize the cost by building components, with no change in the total building cost. Major renovations and repairs to campus facilities costing more than \$100,000 and having a useful life of more than two years have been included in the building costs. This information is maintained in the Asset Management System records which calculates depreciation charges using the estimated service life and the straight line method. The Asset Management System maintains a record of current year depreciation charges and accumulated prior year depreciation charges by building. These procedures provide for recognition of depreciation in whole months increments.
